RINGKASAN

Gastritis adalah inflamasi pada mukosa lambung dari histologis mukosa lambung gastritis berkaitan dengan inflamasi epitel pelapis lambung dan luka pada mukosa lambung. Berdasarkan data buku register bulanan klien rawat inap di Ruang Freesia Lt3 RSU Handayani Kotabumi Lampung Utara Tahun 2022 Bahwa penyakit Gastritis bukan termasuk dalam 10 pnyakit terbanyak namun penyakit Gastritis sangat membutuhkan pertolongan segera. Maka penulis merumuskan masalah “ Bagaimana gambaran asuhan keperawatan pasien dengan Gangguan rasa aman dan nyaman pada kasus Gastritis terhadap Ny.T di Ruang Fresia Lantai 3 RSU Handayani Kotabumi Lampung utara ?”.

Tujuan penulisan lapora tugas akhir ini adalah penulis mampu memberikan gambaran asuhan keperawatan pasien dengan gangguan rasa aman dan nyaman pada kasus Gastritis terhadap Ny.T Di Ruang Fresia Lt3 RSU Handayani Kotabumi Lampung Utara tanggal 7 – 9 Maret 2022.

Data hasil pengkajiaan pada Ny. T Sesuai dengan konsep pengkajiaan Ayu Rahayu (2021) dan rugge (2020) dengan Teknik Non Farmakologis Pada Nyeri Gastritis. Diagnosa keperawatan yang sesuai dengan penulis terapkan yaitu nyeri kronis, nausea dan risiko defisit nutrisi. Rencana keperawatan dibuat sesuai dengan teori, SIKI-SLKI dan SDKI (2017) melalui pemilihan lebel sesuai dengan diagnosa imlementasi sesuai dengan label yang dipilih dan evaluasi dilaksanakan selama tiga hari dan hasilnya masalah teratasi pada setiap diagnosa

Simpulan dari lapuran tugas akhir ini pengkajiaan yang berisi tentang identitas klien dan data hasil pengkajian klien, diagnosa keperawatan menurut teori tidak semua muncul pada klien karena disesuaikan dengan keadaan klien saat pengkajiaan. Sarana hendaknya perawat di ruangan freesia Lt3 RSU Handayani mengevaluasi kembali asuhan keperawatan yang dilaksanankn dan meningkatkan jumlah referensi buku edisi terbaru tentang rasa aman dan nyaman bagi mahasiswa/I poltekkes program studi keperawatan Kotabumi.

Nursing Care of Patients With Disturbances in Feeling Safe and Comfortable In Cases of Gastritis Against Ny. T In the Freesia Room, 3rd Floor, Handayani Hospital, Kotabumi, North Lampung, March 7 - 9, 2022

Xv +, 57 page, 11 tables, 3 images, and 2 attachment

ABSTRACT

Gastritis is inflammation of the gastric mucosa from histology of the gastric mucosa, gastritis associated with inflammation of the gastric lining epithelium and gastric mucosal injury. Based on data from the monthly register book of inpatients in the Freesia Room, 3rd floor, Handayani Hospital, North Lampung, in 2022, Gastritis is not included in the top 10 diseases, but Gastritis is in dire need of immediate help. So the author formulated the problem "How is the description of nursing care for patients with impaired sense of security and comfort in the case of Gastritis against Mrs. T in the Fresia Room, 3rd Floor, Handayani Hospital, Kotabumi, North Lampung?".

The purpose of writing this final assignment report is that the author is able to provide an overview of nursing care for patients with impaired sense of security and comfort in the case of Gastritis against Mrs. T in the Fresia room, 3rd floor, Handayani Hospital, Kotabumi, North Lampung on 07 – 09 March 2022.

The data from the assessment on Ny. T In accordance with the concept of assessing Ayu Rahayu (2021) and rugge (2020) with Non-Pharmacological Techniques for Gastritis Pain. Nursing diagnoses according to the authors apply are chronic pain, nausea and the risk of nutritional deficits. The nursing plan is made according to the theory, SIKI-SLKI and SDKI (2017) through the selection of labels according to the implementation diagnosis according to the selected label and the evaluation is carried out for three days and the results are that the problem is resolved in each diagnosis.

The conclusion from this final assignment report is an assessment that contains the identity of the client and the data from the client assessment, nursing diagnoses according to theory do not all appear on the client because they are adjusted to the client's condition during the assessment. The facilities should be for nurses in the freesia room on the 3rd floor of the Handayani Hospital to re-evaluate the nursing care that is carried out and increase the number of references to the latest edition of books about feeling safe and comfortable for students of the Health Polytechnic of the Kotabumi nursing study program.
