Final Project Report, June 2020

Erwinda Claudia,  
Nursing care of patients with impaired integrity (anxiety) in the case of Caesarea  
posting to Ny. S is in the midwifery room of Mayjend Hospital. HM. Ryacudu  
Kotabumi, North Lampung, April 3-5 05 2019.

xiii + 43 pages, 6 tables.

### ABSTRACT

According to the World Health Organization (WHO), the average SC is 5-15% per 1000 births in the world, the average incidence in government hospitals is 11%, while in private hospitals it can be more than 30%. Demand for the Sectio Caesarea in a number of developing countries surged forward each year (Judhita, 2009 in Sriyanti, 2016). The incidence of Caesarean Sectio in Indonesia according to national survey data in 2007 was 927,000 from 4,030,000 births (Ministry of Health, Republic of Indonesia, 2013). So the authors formulate the problem "How Nursing Care of Patients With Ego Integrity Disorders (Anxiety) in the case of Post sectio caesarea against Ny. S in Midwifery Room RSD Mayjend HM Ryacudu Kotabumi North Lampung April 3 to 5 April 2019 ".

The author's purpose in this final report is to provide an overview of the Nursing Care of Patients with Ego Integrity Disorders (Anxiety) in the case of Post sectio caesarea against Ny. S in Midwifery Room RSD Mayjend HM Ryacudu Kotabumi North Lampung April 3 to 5 April 2019 using the nursing process.

The results of the study in this case obtained data that the patient said dizzy, difficulty sleeping, the patient seemed difficult to move his body, the patient looked nervous, the patient seemed to yawn. Diagnoses that appear on the client are anxiety, barriers to physical mobility, discomfort that can be done planning and nursing care such as NOCs: Level of participation, movement, status of reinforcement, with NIC: Reduction of health protection, relaxation therapy, educational mobilization, environmental management comfort. After three days of nursing action, the evaluation of the three diagnoses can be resolved.

Conclusion: This final project report on nursing theory Post Sectio Caesarea with anxiety in accordance with the client's situation. Mayjend General Hospital HM Ryacudu Kotabumi North Lampung April 3-5 05 2019.
