Final Project Report, 16 May 2023

Vera Rosa Persada,
Nursing care of clients with impaired oxygenation in cases of pneumonia Against Mr. S In the Freesia Room, Handayani Hospital
Kotabumi North Lampung, 14 - 16 November 2022
xvii + 46 pages + 9 tables + 2 pictures

ABSTRACT

Oxygen is one of the requirements needed in life processes because oxygen plays a very important role in the body's metabolic processes. In Indonesia, pneumonia is classified as the most common disease, according to the 2018 Riskesdes, the prevalence of pneumonia is 2.0%. The formulation of the problem in this final report is how Nursing Care of Mr. S with Oxygenation Disorders in Pneumonia cases in the Freesia Room at Handayani Hospital Kotabumi, North Lampung.

The purpose of writing this report is to provide an overview of nursing care for Mr. S with the Need for Oxygenation in Pneumonia Cases in the Freesia Room of Kotabumi Hospital North Lampung on 14-16 November 2022.

The results of the study on Mr. S, it was found that the client looked weak, pale, restless, heard crackles, the client coughed continuously, CRT > 3 seconds, breathing 26 x/minute, the client said tightness, nausea, vomiting, no appetite, difficulty sleeping, and tired easily. Nursing diagnoses enforced ineffective airway clearance, nausea, sleep pattern disturbances. The planning and nursing actions of SLKI were carried out with airway clearance, nausea level, sleep patterns, and SIKI airway management, nausea management, sleep support.

The conclusion after nursing actions on Tn.S for 3 days the problem was partially resolved for the diagnosis of ineffective airway clearance, and the problem was resolved for the diagnosis of nausea and sleep pattern disturbances. Suggestions can add insight, knowledge and can improve the quality of service facilities and infrastructure regarding pneumonia cases.

Keywords: Pneumonia, Nursing Care, oxygenation disorders.
