**KEBERSIHAN GIGI DAN MULUT ANAK (OHI-S) SEKOLAH  
DASAR DITINJAU DARI PERANAN ORANG TUA**

xiv + 48 Halaman, 2 Tabel, 5 Gambar

**ABSTRAK**

Peran orang tua sangat penting dalam mendasari terbentuknya sikap dan perilaku yang mendukung kesehatan gigi dan mulut. Kebersihan gigi anak yang berhubungan dengan orang tua terutama peran orang tua sebagai faktor terbentuknya sikap dan perilaku anak.

Tujuan Penelitian untuk mengetahui kebersihan gigi anak (OHI-S) sekolah dasar di tinjau dari peranan orang tua

Tujuan Penelitian untuk mengetahui kebersihan gigi anak (OHI-S) sekolah dasar di tinjau dari peranan orang tua. Hasil penelitian menunjukkan bahwa merawat kesehatan gigi anak, orang tua perlu mengetahui berbagai hal tentang kesehatan gigi anak, anak perlu diajari oleh orang tua cara menyikat gigi dan menjaga kebersihan gigi dan mulut sejak dini mungkin. Pemberian edukasi mengenai pentingnya perawatan kesehatan gigi dan mulut sebaiknya di berikan kepada anak. Edukasikan kepada anak untuk menyikat gigi dua kali sehari yaitu pagi setelah sarapan dan malam sebelum tidur.

Saran untuk kepada orang tua agar memperhatikan kesehatan gigi dan mulut pada anak-anak nya.

**CHILDREN'S DENTAL AND MOUTH HYGIENE (OHI-S)  
ELEMENTARY SCHOOL REVIEWING FROM THE ROLE OF  
PARENTS**

xiv + 48 Pages, 2 Tables, 5 Pictures

**ABSTRACT**

The role of parents is very important in underlying the formation of attitudes and behaviors that support dental and oral health. Children's dental hygiene is related to parents, especially the role of parents as a factor in the formation of children's attitudes and behavior.

The purpose of the study was to determine the dental hygiene of elementary school children (OHI-S) in terms of the role of parents

The purpose of the study was to determine the dental hygiene of children (OHI-S) in elementary school in terms of the role of parents. The results showed that caring for children's dental health, parents need to know various things about children's dental health, children need to be taught by parents how to brush their teeth. and maintain dental and oral hygiene as early as possible. Providing education about the importance of dental and oral health care should be given to children. Educate children to brush their teeth twice a day, in the morning after breakfast and at night before going to bed.

Suggestions for parents to pay attention to dental and oral health in their children.
