An overview of the Accuracy of Portion Standards Of Animal and Vegetable Side Dishes On The LunchMenu And Their Preparations For Class II And IIIAt The Installation Of The General Hospital In Demang Sepulau Raya Hospital in Central Lampung

X+ 44 pages + 6 tabels, 2 pictures, 7 attachments

ABSTRACT

Food service is a series of activities from menu planning to distributing food to patients in order to provide in quantity and quality that meets nutritional requirements, taste standards, hygiene and sanitation standards. Aspects that affect the quality of the accuracy of food presentation are complete cutlery in accordance with established standards, menus served in accordance with the applicable menu cycle or requested by the patient, portions served in accordance with established portion standards, and the appearance of the food served as a whole. include cleanliness, attractiveness, arrangement of food according to the tool. (Cendanawangi et al., 2016).

The purpose of this study was to determine the accuracy of serving standards and processed animal and vegetable side dishes at Harapan Bunda Hospital in 2022. The research design used is descriptive research. By taking a variable picture of the accuracy of the standard portion on animal and vegetable side dishes.

This type research is descriptive, namely to describe the accuracy of the standard servings animal and vegetable side dishes at lunch for patient. At the nutrition installation of the Demang Sepulau Raya Hospital. The sample in this study was 5 servings and was carried out for 10 days

It was found that the average portion of animal side dishes served at the nutrition installation was 70,6 gram, categorized as not according to the standard portion because <90% - <110%. Meanwhile, the average portion of vegetable side dishes served at the nutrition installation is 69,5 gram, which is categorized as according to the standard portion because it is <90-<10%.

It is hoped that nutrition installation of Demang Sepulau Raya Hospital needs to be held training for serving staff can serve food with the appropriate portion size.
