Overview of Settlement and Housing Sanitation for Tuberculosis Patients in the Work Area of the WayHalim II Inpatient Health Center in Bandar Lampung City in 2022

Xvi+50 Pages, 3 Pictures, 5 Tables, 7 attachments

**ABSTRAC**

Tuberculosis is an infectious infectious disease caused by the bacterium Mycobacterium tuberculosis, which can attack various organs, especially the lungs. Tuberculosis is the biggest cause of death after cardiovascular disease and respiratory disease, the number one in the group. The world is not yet free from TB.

The purpose of this study was to determine the description of the sanitation of settlements and housing for tuberculosis sufferers in the working area of the Wayhalim II Inpatient Public Health Center in Bandar Lampung City in 2022. This type of research was descriptive, with a sample of 50 houses in the working area of the Wayhalim II Inpatient Public Health Center in Bandar Lampung. The data that has been collected is then analyzed using tables with editing and tabulating steps.

Based on the results of the study, it can be concluded that from 50 houses with tuberculosis, it is known that the components of the home environment include residential density of 19 (38.0%) that meet the requirements and 31 (62.0%) do not meet the requirements. Humidity 28 (56.0%) met the requirements and 22 (44.0%) did not meet the requirements. Ventilation 27 (54.0%) met the requirements and 23 (46.0%) did not meet the requirements. Lighting 24 (48.0%) met the requirements and 26 (52.0%) did not meet the requirements. 39 (79.0%) house floors met the requirements and 11 (22.0%) did not meet the requirements. Waste disposal facilities 29 (58.0%) met the requirements and 21 (49.0%) did not meet the requirements. The behavioral components of the occupants include 34 (68.0%) who use the goods simultaneously and 16 (32.0%) who do not use the goods at the same time. Using cutlery at the same time 48 (52.0%) and 26 (52.0%) did not use cutlery at the same time. Smoking habits 12 (24.0%) and non-smoking 38 (76.0%).
