Gambaran Pengetahuan dan Perilaku Tentang Hygiene Sanitasi Makanan pada  
Pedagang Kaki Lima di Lapangan Sember Kota Metro Tahun 2023

xvi + 45 halaman, 6 tabel, dan 3 gambar.

### **RINGKASAN**

Restoran, rumah makan, dan pedagang kaki lima merupakan tempat menjual makanan yang siap dikonsumsi. Kualitas makanan yang disajikan kepada konsumen dapat dipengaruhi oleh tingkat pengetahuan pedagang kaki lima tentang hygiene dan sanitasi dalam pengolahan makanan. Beberapa pedagang yang masih melakukan kebiasaan yang tidak baik, kemungkinan bahaya penularan penyakit yang dijual ke masyarakat dapat terjadi. Tujuan penelitian ini yaitu untuk mengetahui gambaran umum pengetahuan dan perilaku tentang hygiene sanitasi makanan pada pedagang kaki lima di Lapangan Sember Kota Metro Tahun 2023.

Sampel yang digunakan dalam penelitian ini adalah sebanyak 20 pedagang jajanan kaki lima di Lapangan Sember Kota Metro. Data diperoleh dari hasil observasi dan wawancara langsung kepada pedagang jajanan kaki lima di Lapangan Sember Kota Metro dengan menggunakan instrumen checklist dan kuesioner.

Hasil penelitian didapatkan tingkat pengetahuan pedagang yang memiliki kategori baik sebanyak 14 orang (70%) dan kategori cukup sebanyak 6 orang (30%), perilaku hygiene pedagang kaki lima yang memiliki kategori baik sebanyak 11 orang (55%) dan kategori kurang baik sebanyak 9 orang (45%), hygiene peralatan yang memiliki kategori baik sebanyak 13 pedagang (65%) dan kategori kurang baik sebanyak 7 pedagang (35%), hygiene sarana penjaja yang memiliki kategori baik sebanyak 10 pedagang (50%) dan kategori kurang baik sebanyak 10 pedagang (50%). Adapun saran yang dapat diberikan yaitu perlu dilakukannya sosialisasi atau penyuluhan oleh pihak instansi kesehatan terkait penerapan hygiene penjamah makanan yang baik dan benar serta bahaya atau dampak yang akan ditimbulkan baik bagi pedagang kaki lima ataupun konsumen.

Overview of Knowledge and Behavior About Food Sanitation Hygiene in Street  
in Metro City Samber Field in 2023

xvi + 45 pages, 6 tables, and 3 figures

**ABSTRACT**

Restaurants, restaurants, and street vendors are places that sell food that is ready to be consumed. The quality of food served to consumers can be influenced by the level of knowledge of street vendors about hygiene and sanitation in food processing. Judging from some traders who still carry out bad habits, the possibility of the danger of transmitting diseases sold to the public can occur. The purpose of this study is to find out an overview of knowledge and behavior about food sanitation hygiene in street vendors in Metro City Samber Field in 2023.

The sample used in this study was as many as 20 street food vendors in Metro City's Samber Square. Data was obtained from observations and direct interviews with street food vendors in Metro City Samber Field using checklist and questionnaire instruments.

The results of this study were obtained from the level of knowledge of traders who had good categories as many as 14 people (70%) and enough categories as many as 6 people (30%), hygiene behavior of street food vendors who had good categories as many as 11 people (55%) and bad categories as many as 9 people (45%), hygiene equipment that had good categories as many as 13 traders (65%) and poor categories as many as 7 traders (35%), Hygiene of hawker facilities that have a good category of 10 traders (50%) and a bad category of 10 traders (50%). The suggestions that can be given are the need for socialization or counseling by health agencies related to the implementation of good and correct food handler hygiene and the dangers or impacts that will be caused both for street food vendors and consumers.
