Hubungan Pengetahuan Tentang Risiko Pernikahan Dini Dengan Sikap Remaja Usia 14-17 Tahun Di SMAN 01 Blambangan Umpu Kabupaten WayKanan Tahun 2025

xvi + 47 halaman, 5 tabel, 2 gambar, dan 10 lampiran.

ABSTRAK

Pernikahan dini masih menjadi masalah serius di Indonesia, khususnya di Kabupaten Waykanan, Lampung. Data menunjukkan 7,11% perempuan usia 20-24 tahun di Provinsi Lampung menikah sebelum usia 18 tahun. Pada tahun 2023, tercatat 33 kasus dispensasi kawin di Waykanan. SMAN 01 Blambangan Umpu mengalami dampak nyata dimana setiap tahun terdapat siswa yang mengundurkan diri karena ingin menikah. Hal ini menunjukkan kurangnya pemahaman remaja tentang risiko pernikahan dini.

Penelitian ini bertujuan untuk mengetahui tingkat pengetahuan dan sikap remaja tentang pernikahan dini, serta menganalisis hubungan antara pengetahuan tentang risiko pernikahan dini dengan sikap remaja usia 14-17 tahun di SMAN 01 Blambangan Umpu Kabupaten Waykanan tahun 2025.

Metode penelitian yang digunakan adalah metode kuantitatif dengan pendekatan *cross sectional* pada 99 responden, siswa yang dipilih melalui teknik *proportionate stratified random sampling*. Data dikumpulkan menggunakan kuesioner dan dianalisis dengan uji *Chi-Square*.

Hasil uji *chi-square* menunjukkan terdapat hubungan yang signifikan antara pengetahuan tentang risiko pernikahan dini ($p\text{-value} = 0,000$) dengan sikap remaja usia 14-17 tahun di SMAN 01 Blambangan Umpu Kabupaten Waykanan tahun 2025.

Disimpulkan bahwa sebagian besar responden memiliki pengetahuan kurang tentang risiko pernikahan dini dan sikap mendukung pernikahan dini. Disarankan agar sekolah tetap terus mengembangkan kegiatan ekstrakurikuler sebagai sarana penyaluran kreativitas siswa dan perlu peningkatan edukasi yang tepat untuk membentuk sikap positif dalam mencegah pernikahan dini.

The Relationship Between Knowledge of Early Marriage Risks and the Attitudes of Adolescents Aged 14–17 at SMAN 01 Blambangan Umpu, Way Kanan Regency in 2025.

xvi + 47 pages, 5 tables, 2 figures, 10 appendices

ABSTRACT

Early marriage is still a serious problem in Indonesia, especially in Waykanan District, Lampung. Data shows that 7.11% of women aged 20-24 years in Lampung Province were married before the age of 18. In 2023, there were 33 cases of marriage dispensation in Waykanan. SMAN 01 Blambangan Umpu experienced a real impact where every year there are students who resign because they want to get married. This shows the lack of understanding of adolescents about the risks of early marriage.

This study aims to determine the level of knowledge and attitudes of adolescents about early marriage, and to analyze the relationship between knowledge about the risks of early marriage and the attitudes of adolescents aged 14-17 years at SMAN 01 Blambangan Umpu, Waykanan Regency in 2025.

The research method used was a quantitative method with a cross sectional approach on 99 student respondents selected through proportionate stratified random sampling technique. Data were collected using a questionnaire and analyzed using the Chi-Square test.

The results of the chi-square test showed that there was a significant relationship between knowledge about the risks of early marriage (p -value = 0.000) with the attitudes of adolescents aged 14-17 years at SMAN 01 Blambangan Umpu, Waykanan Regency in 2025.

It was concluded that most respondents had insufficient knowledge about the risks of early marriage and attitudes supporting early marriage. It is recommended that schools continue to develop extracurricular activities as a means of channeling student creativity and need to increase appropriate education to form a positive attitude in preventing early marriage.
