HUBUNGAN FASILITAS *DISCHARGE PLANNING* DENGAN MOTIVASI PERAWAT PERIOPERATIF MEMBERIKAN PENDIDIKAN KESEHATAN DI RSUD JEND. A. YANI METRO TAHUN 2021
xviii + 46 halaman, 8 tabel, 2 gambar, 11 lampiran

ABSTRAK

Discharge planning (perencanaan pulang) adalah proses peralihan pasien dari satu tingkat perawatan ke tingkat berikutnya. Keberhasilan pelaksanaan *discharge planning* didukung oleh kelengkapan fasilitas *discharge planning* di ruangan, kelengkapan fasilitas tersebut menyebabkan terbentuknya tinggi-rendah motivasi perawat. Tujuan penelitian ini adalah mengetahui hubungan fasilitas *discharge planning* dengan motivasi perawat perioperatif memberikan pendidikan kesehatan di RSUD Jend. A. Yani Metro Tahun 2021. Desain penelitian observasional pendekatan *cross sectional*. Populasi adalah perawat perioperatif, sampel 33 responden. Analisis dengan Uji *Chi-square*. Waktu penelitian mulai 10-17 Juni 2021. Hasil penelitian ini didapatkan 22 orang responden (66,7%) menyebutkan fasilitas *discharge planning* lengkap, sedangkan responden dengan motivasi tinggi sebanyak 19 orang (57,6%). Hasil uji statistik diperoleh nilai p value=0,00 ($p < \alpha$ atau $p < 0,05$) maka dapat disimpulkan adanya Hubungan Fasilitas *Discharge Planning* dengan Motivasi Perawat Perioperatif Memberikan Pendidikan Kesehatan di RSUD Jend. A. Yani Metro Tahun 2021. Sarannya adalah sebaiknya fasilitas *discharge planning* lengkap di setiap rumah sakit untuk mendukung pelaksanaan *discharge planning* yang optimal.

Kata kunci : Fasilitas *Discharge Planning*, Motivasi , Perawat Perioperatif

ABSTRACT

Discharge planning is the process of moving a patient from one level of care to the next. The successful implementation of discharge planning is supported by the completeness of discharge planning facilities in the room, the completeness of these facilities causes the formation of high-low nurse motivation. The purpose of this study was to determine the relationship between discharge planning facilities and the motivation of perioperative nurses to provide health education at RSUD Jend. A. Yani Metro 2021. The design of this research is an observational cross sectional approach. The population is perioperative nurses, the sample is 33 respondents. Analysis with Chi-square test. The time of the study starts from 10-17 June 2021. The results of this study obtained 22 respondents (66.7%) who mentioned complete discharge planning facilities, while respondents with high motivation were 19 people (57.6%). The results of statistical tests obtained p value=0,00 ($p < \alpha$ or $p < 0,05$), it can be concluded that there is A Relationship Between Discharge Planning Facilities and Perioperative Nurses Motivation to Provide Health Education at RSUD Jend. A. Yani Metro in 2021. The suggestion is that discharge planning facilities should be carried out, complete in every hospital to support the implementation of optimal discharge planning.
